

## ROOFRITE 15 YEAR WARRANTY\*

### ABOUT THE APCO ROOFRITE WARRANTY

The APCO ROOFRITE WARRANTY is designed to give you, by following the recommended procedures as per your approved applicator training, a durable coating for 15 years from the date of completion that will not peel or lift and will maintain its water resistance. This warranty does not cover minor colour fading or fair wear and tear.

***Our 15 YEAR WARRANTY is based on the requirement that every 3 years for 15 years after the initial restoration programme is completed, a full maintenance check and fungicide treatment will be carried out on the restored roof.***

The maintenance check is to be performed by the application company. The regular application of fungicide treatment to the roof surface is critical in helping to prevent the spore growth of mildew, lichen and certain grasses that can penetrate the roof's protective coating and damage the surface.

You will be provided a copy of the inspection sheet and work completed. There should be a nominal charge for the inspection check, however this could be incorporated into the initial work. This charge is dependent on the size of the roof.

Full details of the warranty should be read in the "Warranty" section of the "Terms and Conditions" of the restoration programme Agreement.

**\* For a Galvanised Iron Roof the warranty is for 10 Years with the following restrictions:**

- 1) The roof must not have been painted before.**
- 2) If red rust is present anywhere on the roof – No Warranty**
- 3) Zinc Galvanising MUST be in very good condition, less than 10 years old.**
- 4) The full, recommended Roofrite Paint system MUST be used.**
